## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 5-13 and 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pinell et al (US Patent 5,084,492).

Pinell et al teach high solids content, aqueous developer-containing printing inks having as its main ingredients water, a non-volatile diluent and an acidic color developer (abstract). The reference further teaches that a binder may also be present in the composition including starch (biodegradable amphiphilic compound), polyvinyl alcohol and polyvinyl pyrrolidone (biodegradable polymer) and combinations thereof (col. 3 lines 62-68). The reference remains silent to whether the components are biodegradable, however it is the position of the Examiner that because these are the same components taught by Applicant that the components would obviously be biodegradable absent tangible evidence to the contrary. Additional components may also be present in the composition such as dyes, pigments, wax, polyethylene, anti-foaming agents, bactericides, etc. (col. 4 lines 5-9). The general composition of the ink is as follows: 30-50% water, 15-40% non-volatile diluent, 10-60% acidic color developer, 0-10% binder, 0-70% filler and 0-5 miscellaneous ingredients (col. 4 lines 11-15). The ink composition

may be readily applied to a support sheet by using conventional, gravure or flexographic coating equipment (col. 6 lines 26-31).

Pinell et al and the claims differ in that Pinell et al does not teach the exact same proportions as recited in the instant claims.

However, one of ordinary skill in the art at the time the invention was made would have considered the invention to have been obvious because the compositional proportions taught by Pinell et al overlap the instantly claimed proportions and therefore are considered to establish a prima facie case of obviousness. It would have been obvious to one of ordinary skill in the art to select any portion of the disclosed ranges including the instantly claimed ranges from the ranges disclosed in the prior art reference, particularly in view of the fact that;

“The normal desire of scientists or artisans to improve upon what is already generally known provides the motivation to determine where in a disclosed set of percentage ranges is the optimum combination of percentages”, In re Peterson 65 USPQ2d 1379 (CAFC 2003).

Also, In re Geisler 43 USPQ2d 1365 (Fed. Cir. 1997); In re Woodruff, 16 USPQ2d 1934 (CCPA 1976); In re Malagari, 182 USPQ 549, 553 (CCPA 1974) and MPEP 2144.05.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-15 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
